we have become aware  
recession, economic downturn, stock market crash, virus  
eco-crisis, climate change, virus  
we have become aware that so-called markets  
do not always repair themselves

Earth is vulnerable

it is no longer a question of whose idea or ism is right  
no longer interested in being part of a gladiator battle of values

I am vulnerable

we must take joint responsibility  
we have to carry each other on our backs  
we must take our responsibility  
not leave it to a faceless market

Life is vulnerable

we must  
because

I am vulnerable  
Earth is vulnerable  
Life is vulnerable

we must

fragile is life
